**Project tittle:**  
**School Management system**

## Phase 1: ERD

### Student Table

Student_ID	Stud First_Name	Stud last_Name	City
1	Aliza	Ahmad	Lahore
2	Maria	Jawad	Karachi
3	Raffia	Asif	Islamabad

### Table is in Normalize form

- a. Is there any partial dependency that exists in your tables?  
No
- b. Have you found any transitive dependency in your tables?  
No
- c. All your tables in 3rd NF?  
No

### Parent Table

Parent_ID	Parent First_Name	Parent last_Name	City
1	Bilal	Ahmad	Lahore
2	Ayesha	Jawad	Karachi
3	Khalid	Asif	Islamabad

### Table is in Normalize form

- a. Is there any partial dependency that exists in your tables?  
No
- b. Have you found any transitive dependency in your tables?  
No
- c. All your tables in 3rd NF?  
No

### Teacher Table

Teacher_ID	Teacher First_Name	Teacher last_Name	City
1	Ahmad	Asif	Karachi
2	Maha	Jawad	Lahore
3	Ali	Awais	Islamabad

### Table is in Normalize form

- a. Is there any partial dependency that exists in your tables?  
No
- b. Have you found any transitive dependency in your tables?  
No
- c. All your tables in 3rd NF?  
No

### Admin Table

Admin	Admin First_Name	Admin Last_Name	City
1	Ahmad	Asif	Karachi
2	Maha	Jawad	Lahore
3	Ali	Awais	Islamabad

### Table is in Normalize form

- a. Is there any partial dependency that exists in your tables?  
No
- b. Have you found any transitive dependency in your tables?  
No
- c. All your tables in 3rd NF?  
No

**Class Table**

Class_no	Class_Name	Class Teacher
10	English	Rania
11	Urdu	Waniya
12	Math	Saniya

Table is in 1<sup>st</sup> and 2<sup>nd</sup> normal for

**Teacher detail**

Class_Name	Class Teacher
English	Rania
Urdu	Waniya
Math	Saniya

a. Is there any partial dependency that exists in your tables?

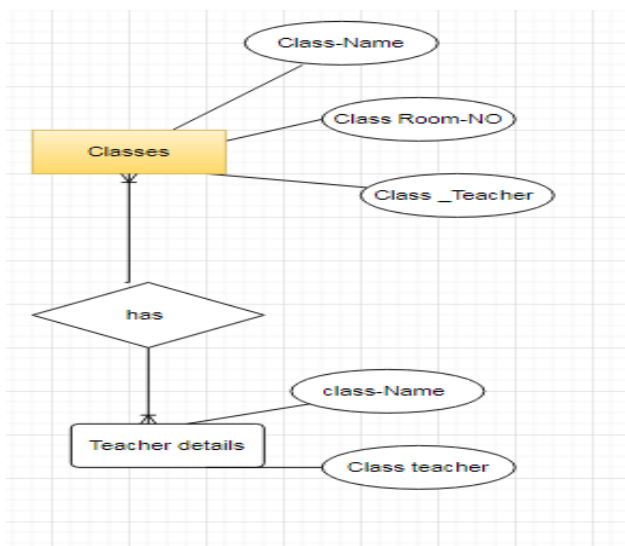

No

b. Have you found any transitive dependency in your tables?

YES

c. All your tables in 3rd NF?

YES

**Course Table:**

<b>Course Code</b>	<b>course Name</b>
<b>001</b>	<b>English</b>
<b>009</b>	<b>Urdu</b>
<b>015</b>	<b>Math</b>

**Table is in Normalize form**

- a. **Is there any partial dependency that exists in your tables?**  
**No**
- b. **Have you found any transitive dependency in your tables?**  
**No**
- c. **All your tables in 3rd NF?**  
**No**

**Exam table:**

Exam Room No	Exam Name
23	Physics
24	Bio
25	Math

**Table is in Normalize form**

- a. Is there any partial dependency that exists in your tables?  
No
- b. Have you found any transitive dependency in your tables?  
No
- c. All your tables in 3rd NF?  
No

**School Table**

School code	School Name	Branch	Address	City	Phone no
A231	Punjab school	Johor town	1C2	Lahore	+923456773
B234	Punjab school	PIA	2C55	Lahore	+920988753
C456	Punjab school	MODEL Town	FJ block	Lahore	+9203564646
D786	Punjab school	Gulberg	M block	Lahore	04242450259

**Table is in Normalize form**

- a. Is there any partial dependency that exists in your tables?  
No
- b. Have you found any transitive dependency in your tables?  
No
- c. All your tables in 3rd NF?  
No

**Library Table**

Book_ID	Book_title	Author Id	Book_Author	Publish date	Isbn
23	Smart Money Smart Kids	1	Dave Ramsey	2014-04-29 00:00:00	124578
36	Smart Money Smart Kids	3	Rachel Cruz	2020-04-19 00:00:00	354688

**2<sup>nd</sup> Normal form**

**Book Details**

Book_ID	Book_title
23	Smart Money Smart Kids
36	Smart Money Smart Kids

**Author Details**

Book_title	Book_Author
Smart Money Smart Kids	Dave Ramsey
Smart Money Smart Kids	Rachel Cruz

**3<sup>rd</sup> Normal form**

**Author details**

Book_ID	Author Id	Book_Author
23	1	Dave Ramsey
36	3	Rachel Cruz

a. Is there any partial dependency that exists in your tables?

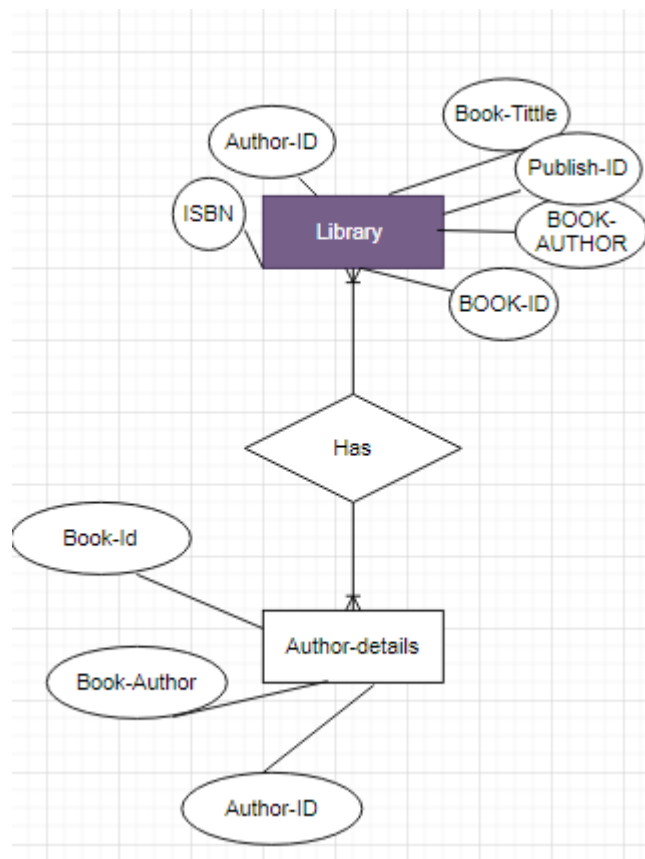

YES

B. Have you found any transitive dependency in your tables?

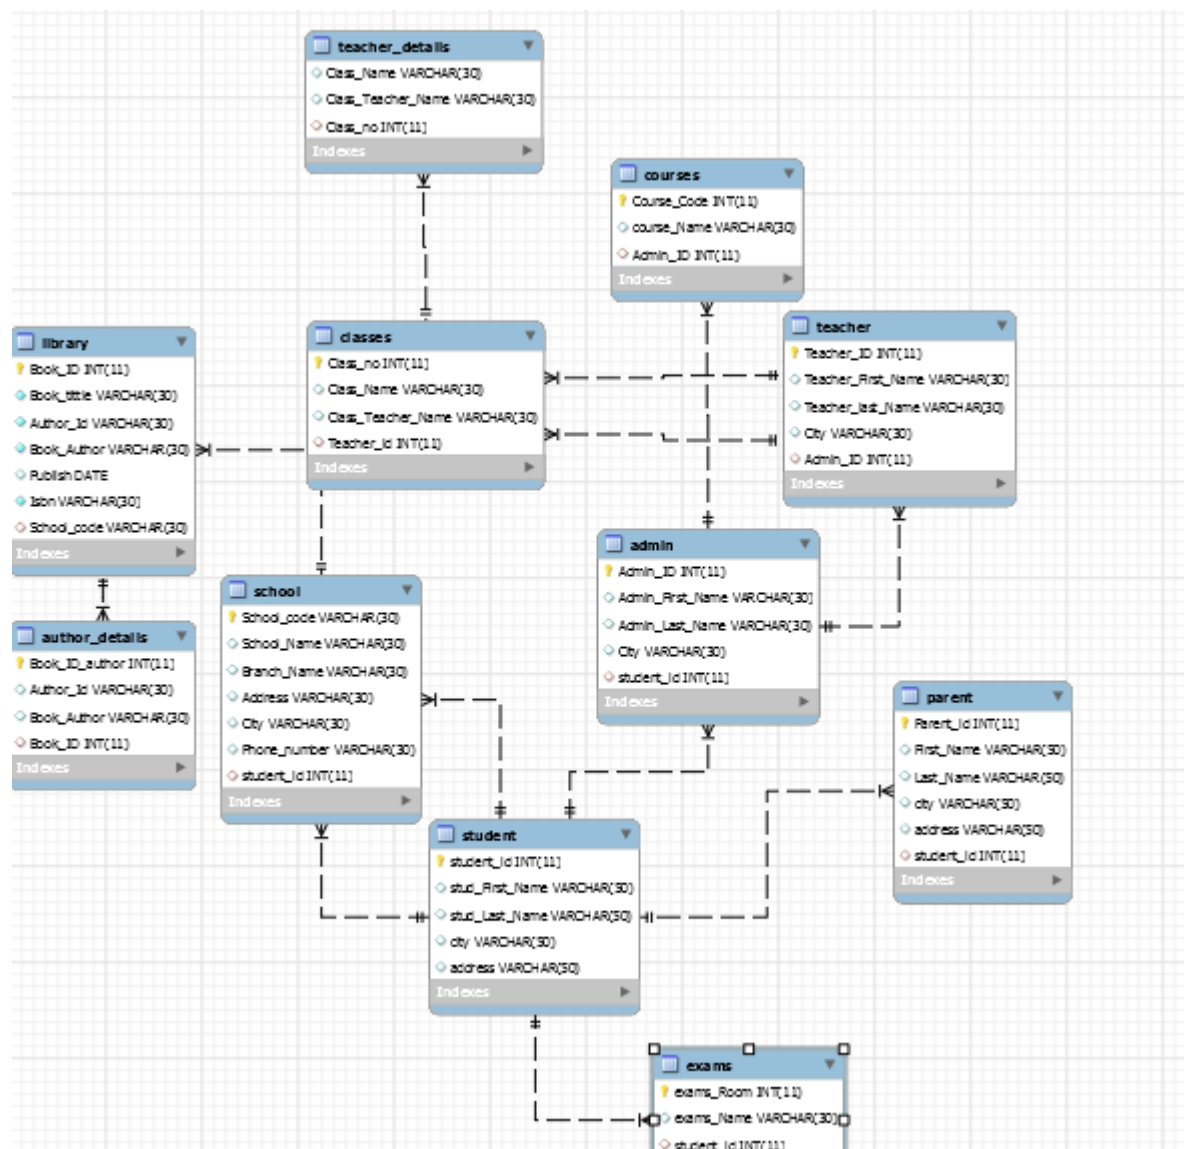

YES

C. All your tables in 3rd NF?

YES

After step-1 create all tables in MYSQL Workbench (Paste screen shot Here of your normalized ER diagram using MySQL Workbench [hint: use reverse engineering in MYSQL Workbench]). Also paste screenshot of all tables.

After step-2 insert at-least 10 records and maximum as you can in all your Tables. (Paste screenshot of output and query insertions)

The screenshot shows the SQL Server Enterprise Manager interface. On the left, the 'SCHEMAS' pane shows the 'school' database with various tables. The main pane displays the SQL script for creating the 'student' table and inserting 10 records. The 'student' table has the following structure:

```
create table student(
  student_id int primary key,
  stud_First_Name varchar(50),
  stud_Last_Name varchar(50),
  city varchar(50),
  address varchar(50)
);
```

The data is inserted into the 'student' table using the following SQL statement:

```
insert into student values(1,'Aliza','Ahmad','Lahore','1c1 johor town'),
(2,'Maria','Jawad','Karachi','1c3'),
(3,'Raffia','Asif','Islamabad','E block'),
(4,'Mahad','khan','Faslabad','M block'),
(5,'Maha','jutt','Gujrat','c cant area'),
(6,'Ayesha','butt','lahore','B_block Model town'),
(7,'Maheen','ALI','Rwalpindi','Cant area'),
(8,'Ahad','Rahman','Lahore','township'),
(9,'Abdullah','khan','karachi','12c1'),
(10,'hifsa','Mansoor','lahore','1c1 johor town');
```

The 'Result Grid' shows the following data:

student_id	stud_First_Name	stud_Last_Name	city	address
1	Aliza	Ahmad	Lahore	1c1 johor town
2	Maria	Jawad	Karachi	1c3
3	Raffia	Asif	Islamabad	E block
4	Mahad	khan	Faslabad	M block
5	Maha	jutt	Gujrat	c cant area
6	Ayesha	butt	lahore	B_block Model town
7	Maheen	ALI	Rwalpindi	Cant area
8	Ahad	Rahman	Lahore	township
9	Abdullah	khan	karachi	12c1
10	hifsa	Mansoor	lahore	1c1 johor town

```

42 (7,'ALI','khan','Rwalpindi','Cant area','7'),
43 (8,'saif','Rahman','Lahore','C1,township','8'),
44 (9,'Abdul-Rahman','khan','karachi','12c1','9'),
45 (10,'Mansoor','Ali','lahore','1c1 johor town','10');
46 • select * from parent;
47

```

	Parent_id	First_Name	Last_Name	city	address	student_id
▶	1	Ahmad	Ali	Lahore	1c1 johor town	1
	2	Raffia	Jawad	Karachi	1c3	2
	3	Maria	Asif	Islamabad	E block	3
